Latar Belakang

- Sektor kuliner Indonesia tumbuh stabil dengan kontribusi industri makanan dan minuman sebesar 4,47% pada 2023, menunjukkan peluang pasar yang besar namun kompetitif.
- Ayam geprek menjadi salah satu produk kuliner yang diminati konsumen karena cita rasa, variasi menu, dan harga terjangkau, sehingga memiliki potensi pengembangan usaha di berbagai daerah.
- Di tengah meningkatnya perilaku konsumsi digital masyarakat, banyak UMKM kuliner masih beroperasi secara manual sehingga membutuhkan solusi berbasis teknologi.

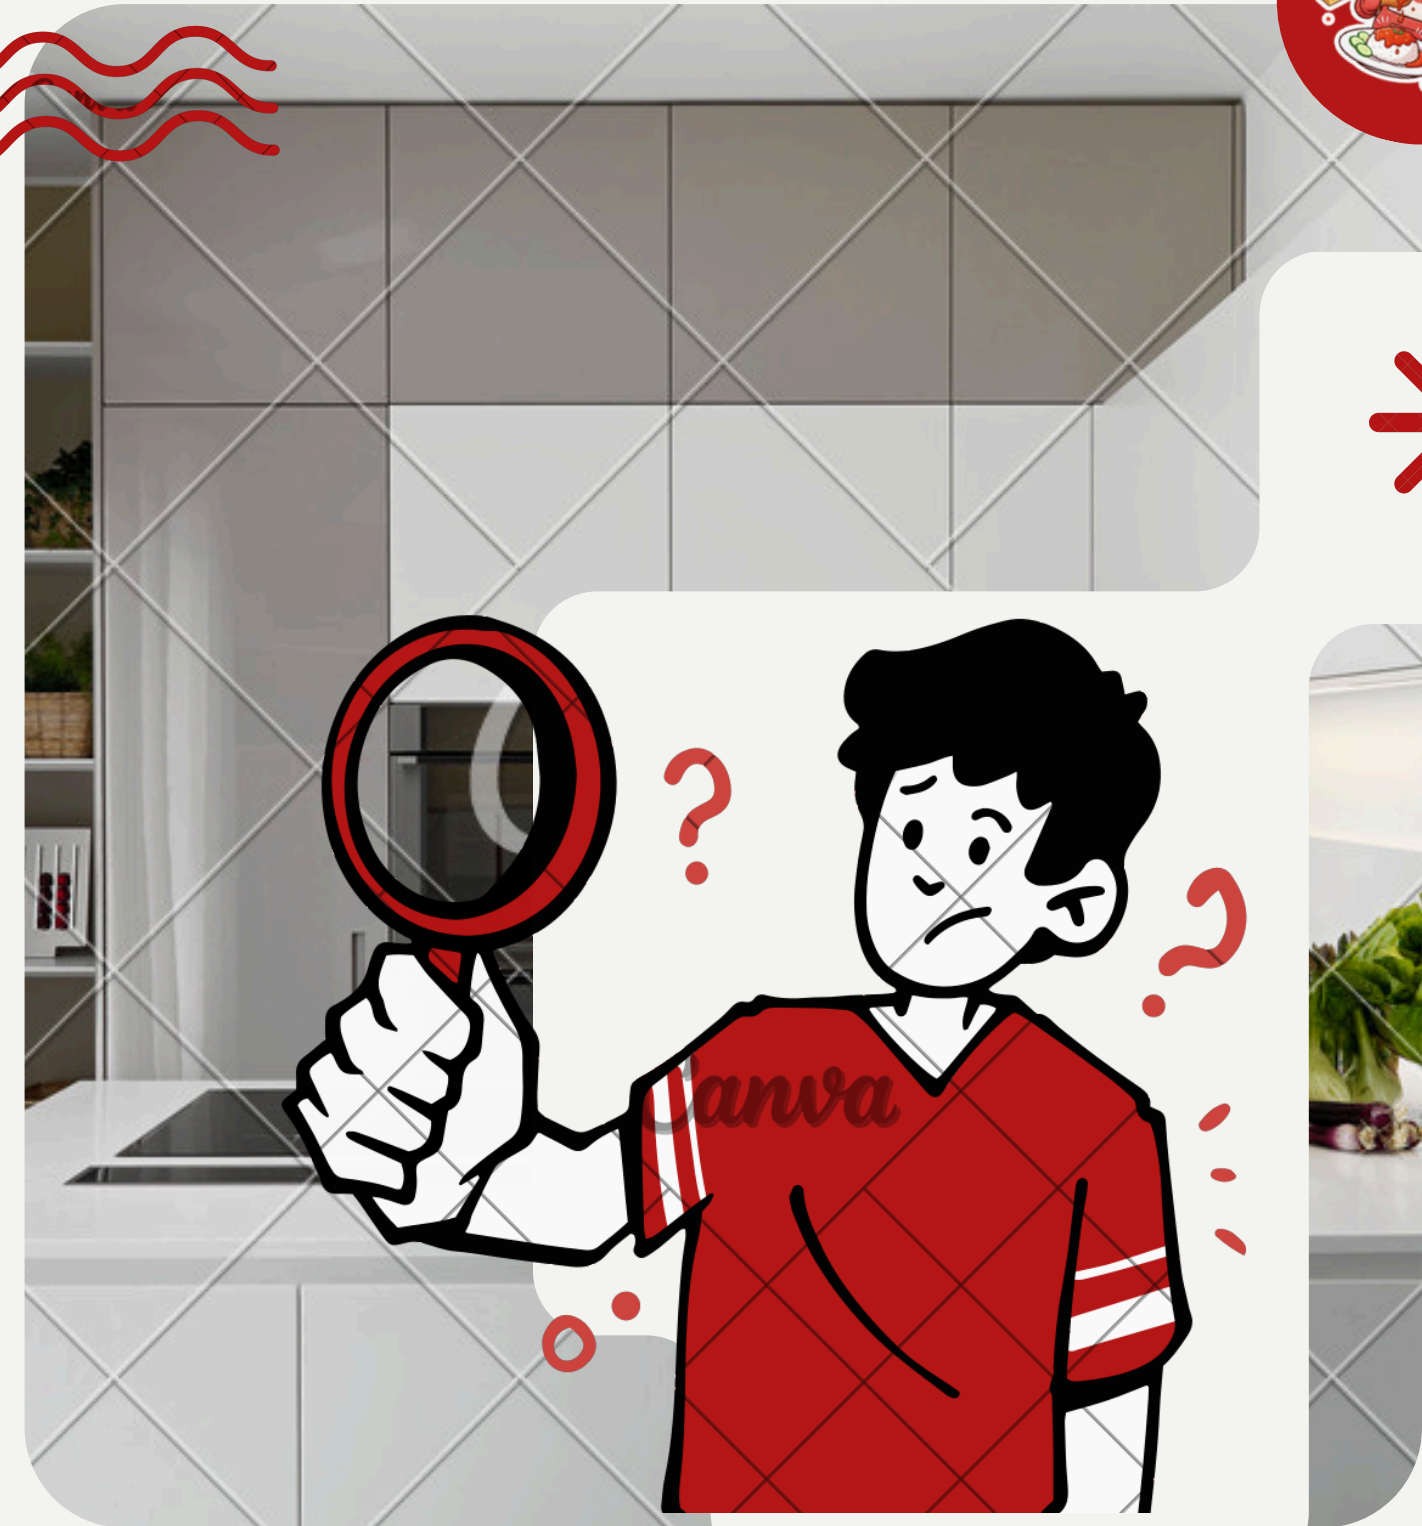

The Problem

Apa yang menjadi masalahnya?

- ⊗ Sebagian besar UMKM kuliner masih menggunakan sistem manual dalam pemesanan dan pencatatan transaksi, sehingga berisiko menimbulkan inefisiensi dan kesalahan data.
- ⊗ Kesenjangan antara perilaku konsumen yang semakin digital dan sistem operasional UMKM yang belum terdigitalisasi.
- ⊗ Strategi pemasaran konvensional kurang efektif dalam membangun loyalitas pelanggan di tengah persaingan kuliner yang ketat.

The Solution

Bagaimana solusinya?

Pengembangan aplikasi Geprek Momo sebagai sistem pemesanan digital untuk meningkatkan efisiensi layanan dan meminimalkan kesalahan transaksi.

Penerapan program loyalitas digital melalui fitur kupon untuk meningkatkan engagement, transaksi berulang, dan loyalitas pelanggan.

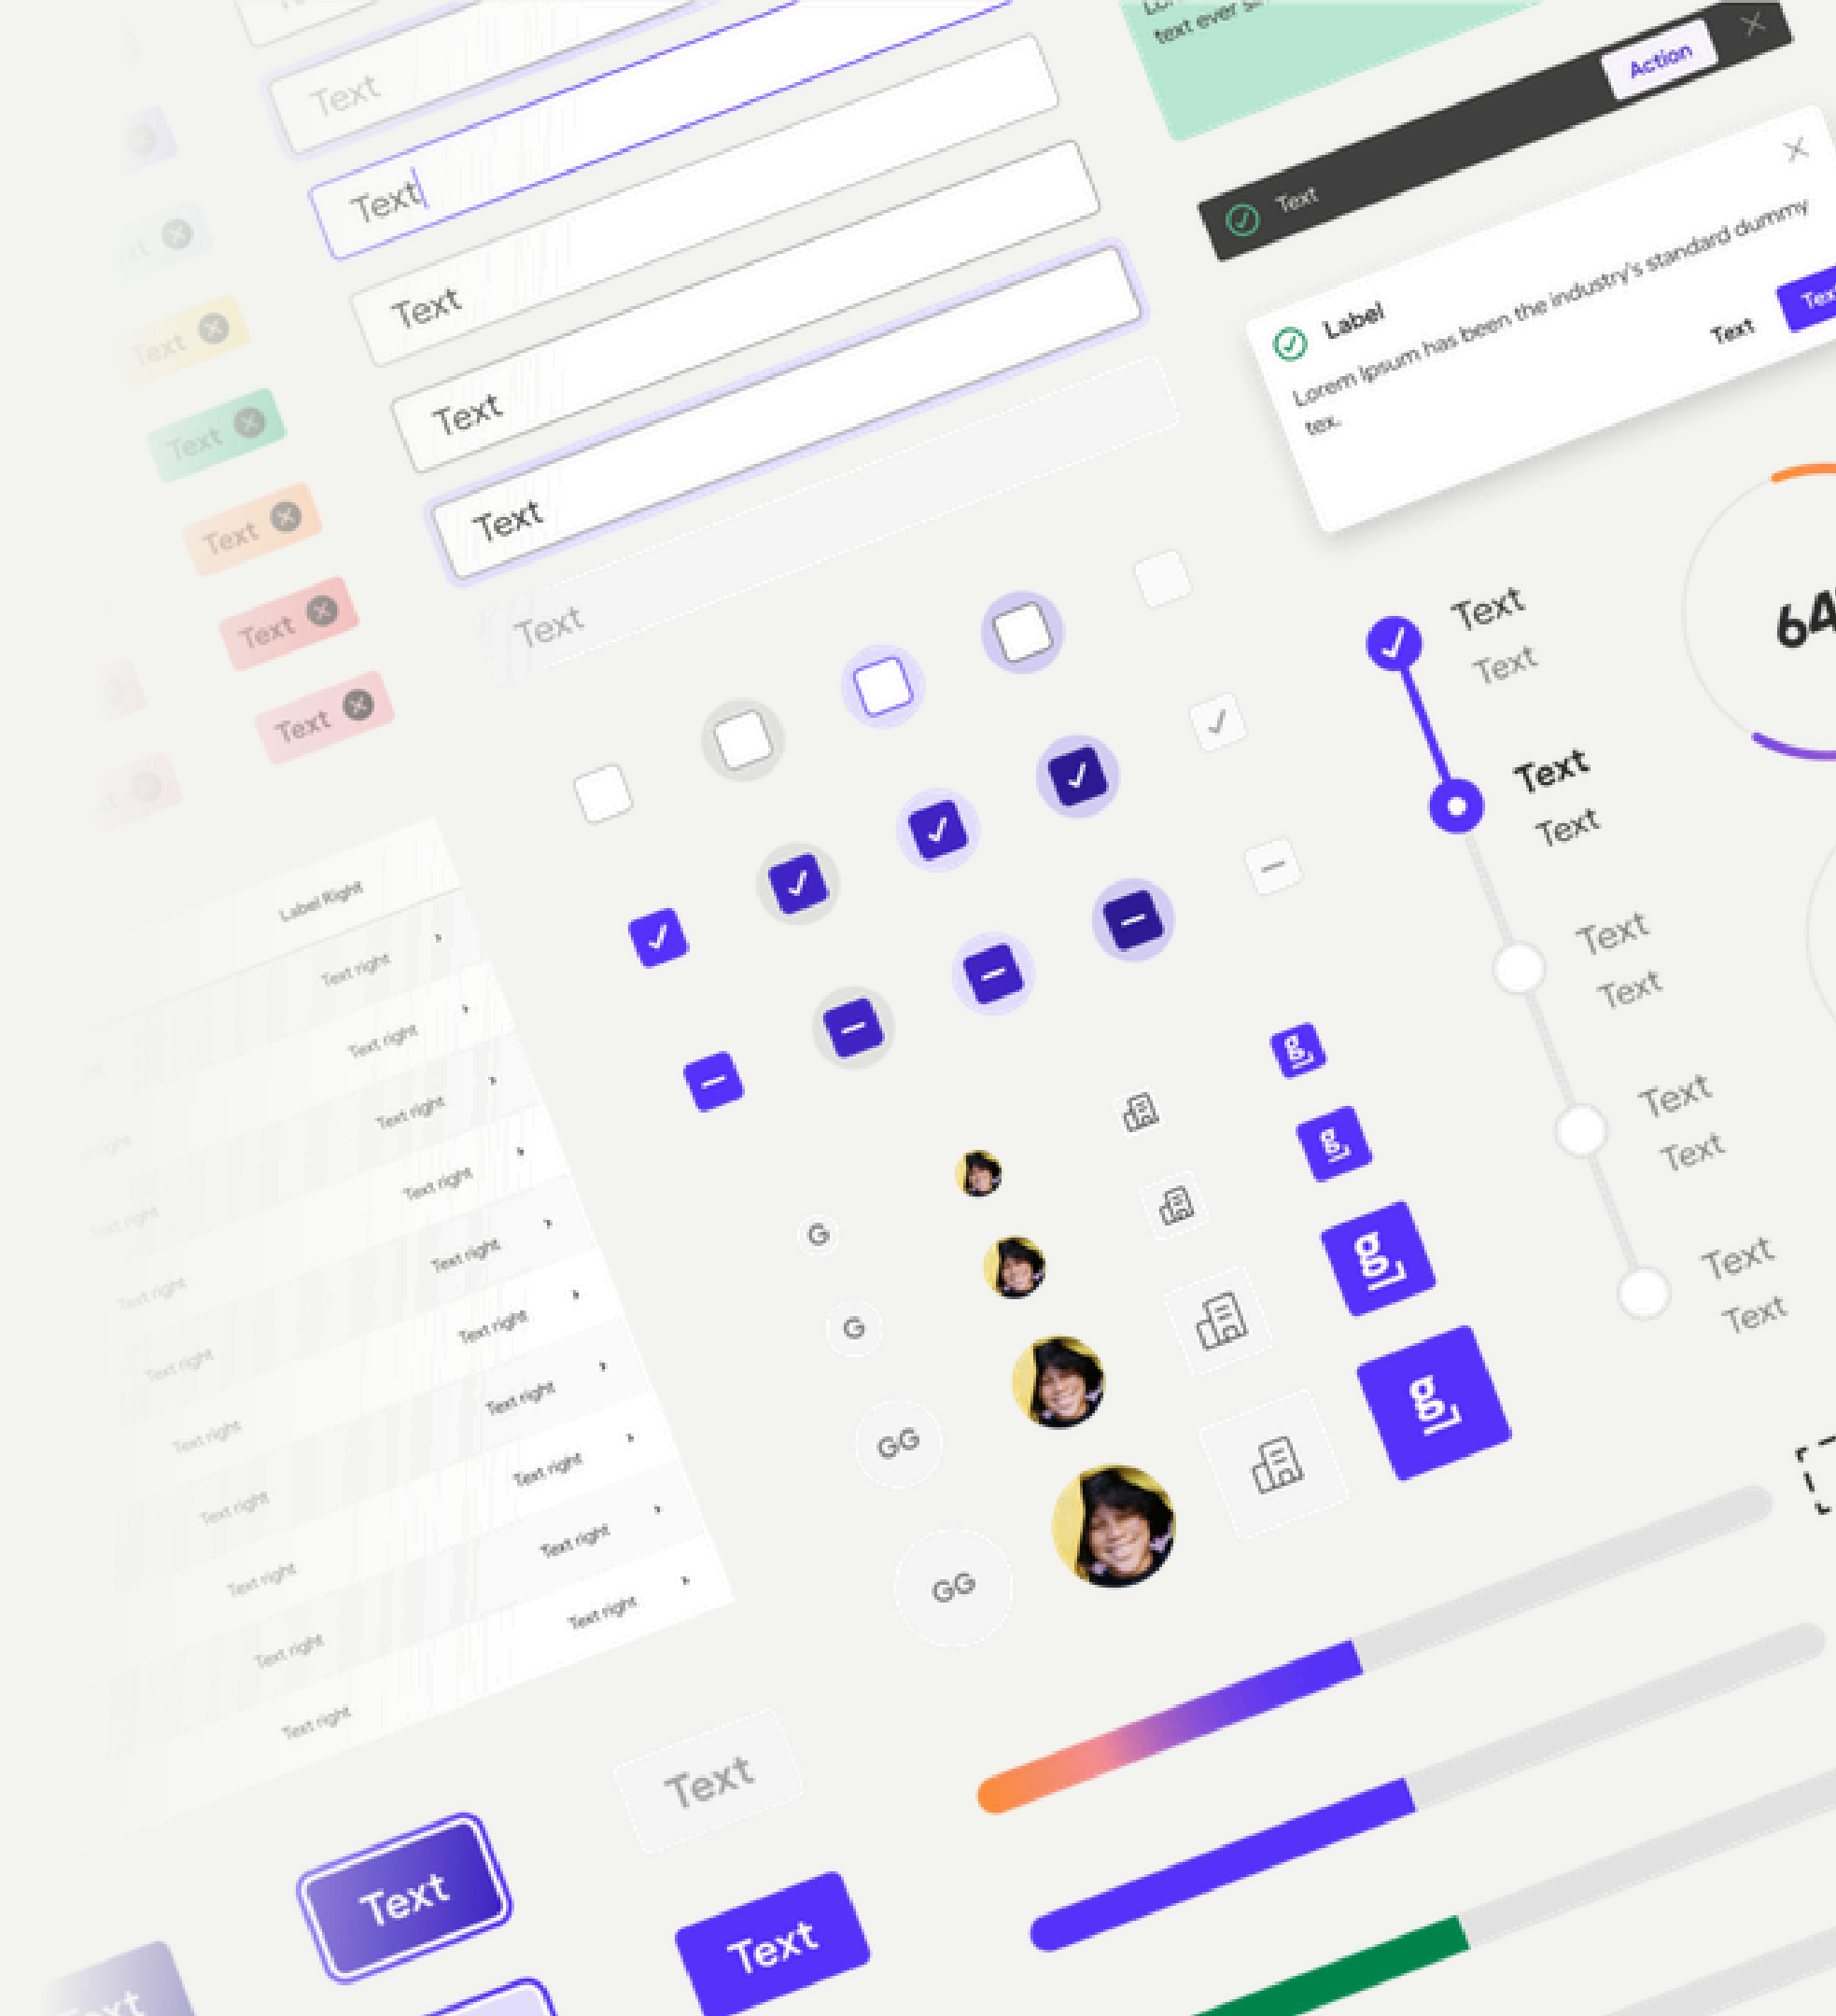

Implementasi sistem informasi terintegrasi guna mendukung pencatatan keuangan, pengelolaan pesanan, dan evaluasi kinerja usaha secara akurat.

DESIGN SYSTEM

LOGO

Styles

Logo

Logo Ayam Geprek Momo, yang berupa siluet kepala ayam jago merah dalam lingkaran, melambangkan **semangat, energi, dan keunggulan rasa pedas**. Warna merah mencerminkan gairah dan tingkat kepedasan, sementara figur ayam jago menggarisbawahi **kekuatan, dominasi, dan keberanian merek untuk menjadi pilihan nomor satu**.

Brand Color

Styles

Color

The palette is split into a greyscale, color set and functional color.

Greyscale

White, Grey, Black

Greys

0	#FFFFFF
30	#E2E4EB
40	#A8AAB2
50	#707187
60	#313242
70	#000000

Color

Shades of colour derived from the Base shade for each colour.

Red

0	#FFC0C0
30	#FF9595
40	#F83D3D
50	#B41717
60	#920A0A
70	#4E0000

Base

Functional Color

In functional color, green represents a safe, correct, or successful state, while red indicates an error, danger, or a condition that requires immediate attention.

Functional Color

Success	#17B429
Red_200	#D62828

SPACING

Types

Geometry

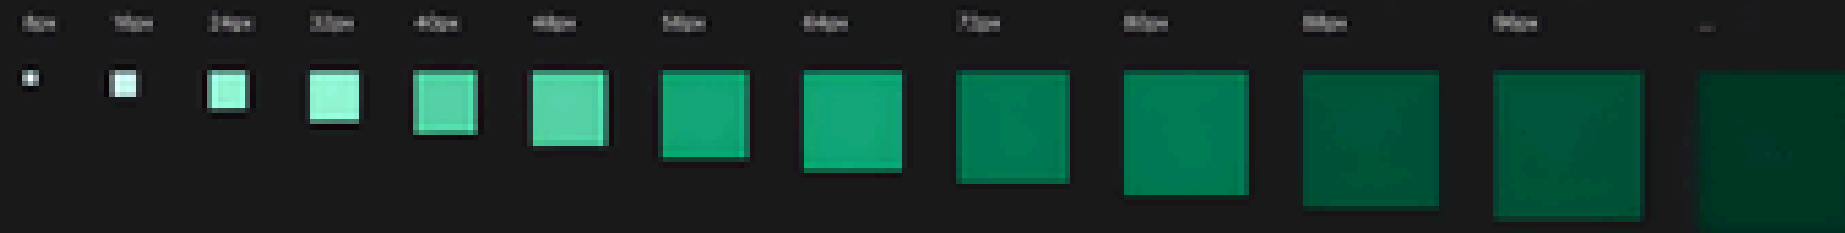

Where possible, we try and ensure that all geometric measurements (widths, heights, margins, padding) are multiples of 8px.

Of course, there are always exceptions to any rule. But this principle helps preserve consistency and continuity across the design system — reducing confusion for engineers and in the handover phase.

Spacing

Standard: 8px

Spacing increments for use in the majority of scenarios

Minor: 4px

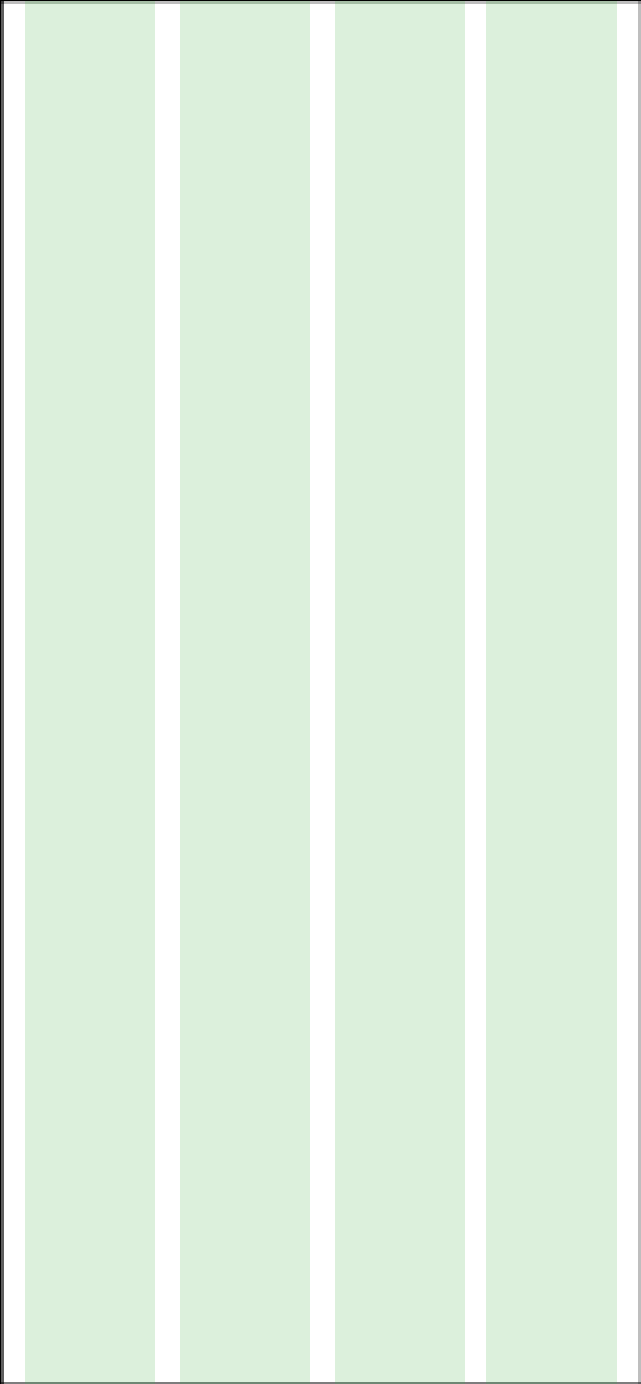

Smaller increments only for use in specific circumstances where the standard 8px isn't sufficient

Grid

4 Columns

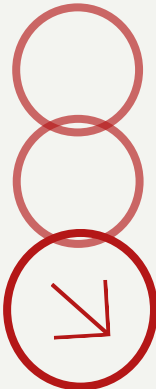

This grid should be used across all devices

Settings

Count: 4
Type: Stretch
Width: Auto
Margin: 16
Gutter: 16

N15	5	1	5	1	5	1	5	1	1	1	36	90
N16	4	2	4	2	4	2	5	1	4	1	33	82.5
N17	5	1	5	1	5	1	5	1	1	1	36	90
AVERAGE SCORE												84.85294

RESULT : 84,85294 / 85

System Usability Scale

RESULT : 84,85294 / 85

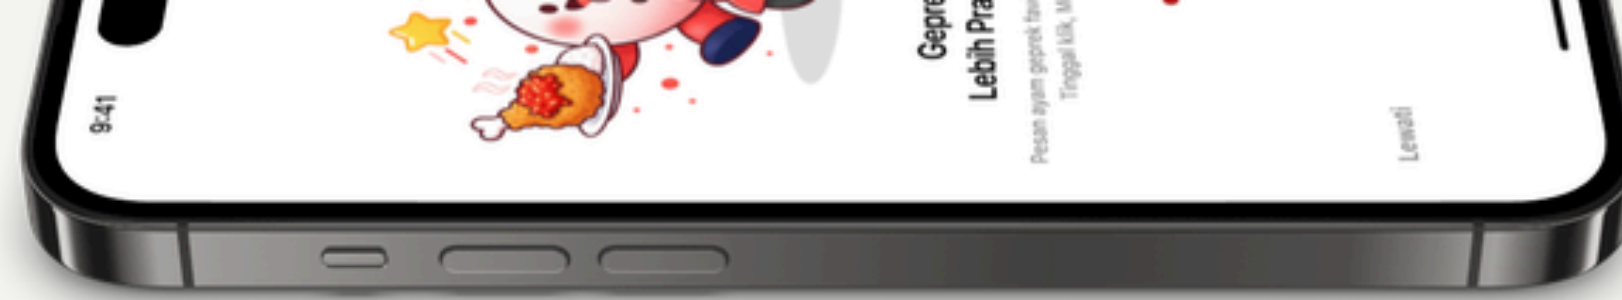

Maka skor tersebut masuk dalam kategori **EXCELLENT** dengan grade scale **B** artinya secara usability berdasarkan data tersebut mendapatkan penilaian **dapat diterima atau layak**.

Kritik dari Responden

1. Saat prototype dijalankan terjadi lag/patah-patah.
Hal ini terjadi karena, animasi pada aplikasi kami cukup banyak, jadi jika user menggunakan handphone untuk menjalankan prototype maka akan terjadi lag.

Team 04

Terimakasih
